

DE MONTAGEANLEITUNG

Dachanker KK/KS/FS

Für KalZip- und Stehfalzdächer

EN INSTALLATION INSTRUCTIONS

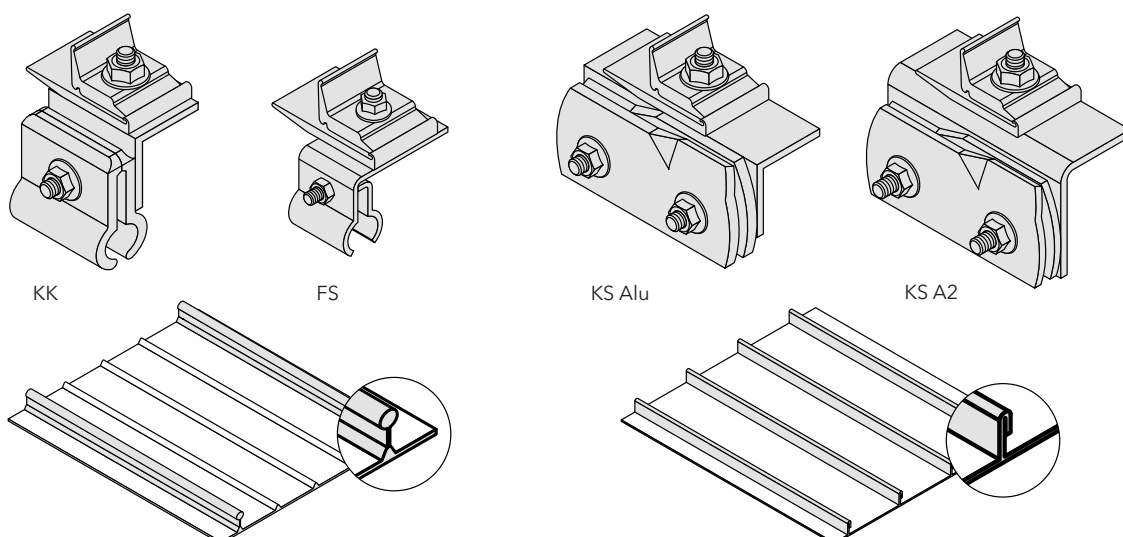

Roof Brackets KK/KS/FS

For KalZip roofs and standing seam roofs

FR INSTRUCTIONS DE MONTAGE

Pattes de fixation KK/KS/FS

Pour les toits KalZip et les toits à joints debout

DE Wichtige Hinweise

- Die Auslegung des Montagesystems (Dachankerzahl, Schienentragweite etc.) ist projektbezogen entsprechend den vorgegeben Normen (DIN EN 1991-1-3 und DIN EN 1991-1-4:2010-12, Einwirkung auf Tragwerke - Allgemeine Einwirkungen - Schneelasten und Windlasten) durchzuführen.
- Voraussetzung für den bestimmungsgemäßen Einsatz ist immer ein geeigneter Befestigungsuntergrund, der die auftretenden Kräfte (Gewichtslast, Wind und Schneelast) aufnehmen kann.

EN Important Notes

- The dimensioning of the mounting system (number of roof brackets, rail span etc.) should be specifically carried out for each individual project, following the specified structural engineering standards and regulations (EN 1991-1-3 and -4).

- Prerequisite for the proper application always is a solid mounting base that can accommodate the occurring forces (weight, wind and snow loads).

Notice importante

- Le dimensionnement du système de fixation (nombre des pattes de fixation, distance entre deux pattes etc.) doit être calculé en fonction des données du projet et devra satisfaire aux normes spécifiés (EN 1991-1-3 et -4).
- Une structure de base appropriée pouvant résister aux efforts en présence (poids, vent et neige) représente la condition préalable au respect des normes.
